

UHRICHSVILLE ENVIRONMENTAL POLICY

Aleris Rolled Products, Inc. (NRM) and IMCO Recycling of Ohio, LLC (UHR), is committed to meeting legislative, regulatory and other requirements applicable to its business. Regulatory compliance represents a minimum. When it has been determined essential and proper, we will establish and comply with internal standards, which may go beyond legal requirements. In seeking appropriate ways to protect the environment, the issue of cost alone does not preclude consideration of possible solutions. These solutions will be prioritized to ensure the greatest anticipated benefit while striving for continuous improvement of the environmental management system, prevention of pollution, waste reduction, and improvement in efficiency of energy use.

Paraphrased NRM & UHR's environmental policy is "CPR"

Continuous Improvement
Pollution Prevention
and
Regulatory Compliance
