SECTION 4: First aid measures

4.1. Description of first aid measures
First-aid measures general:
Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice.

First-aid measures after inhalation:
Unlikely route of exposure.
Dust from processing: Allow victim to breathe fresh air. Allow the victim to rest. If feel unwell, seek medical attention.

First-aid measures after skin contact:
Wash hands with water and soap.
Dust from processing: Wash all exposed skin area with mild soap and water, followed by warm water rinse. If skin irritation or rash occurs: Get medical advice/attention.

First-aid measures after eye contact:
Unlikely route of exposure.
Dust from processing: Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persists.

First-aid measures after ingestion:
Unlikely route of exposure.
Dust from processing: Ingestion is not considered a potential route of exposure. In case of accidental intake, rinse mouth

4.2. Most important symptoms and effects, both acute and delayed
Symptoms/injuries after eye contact:
Dust from processing: May cause physical reversible eye irritation. Redness, watering.

4.3. Indication of any immediate medical attention and special treatment needed
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media:
This product does not present fire or explosion hazards as shipped. Fine turnings, fine dust from processing may be readily ignitable. Use dry chemical extinguisher.

Unsuitable extinguishing media:
Do not use water or foam.

5.2. Special hazards arising from the substance or mixture
Fire hazard:
This product does not present fire or explosion hazards as shipped. Dust from processing: May be readily ignitable or combustible.

Explosion hazard:
This product does not present fire or explosion hazards as shipped. Avoid generation of dust; fine dust dispersed in air in sufficient concentration, and in the presence of an ignition source is a potential dust explosion hazards.

Reactivity:
This product is not reactive as supplied. Dust or fine particles are violently reactive to strong oxidizers with considerable heat generation.

5.3. Advice for firefighters
Protective equipment for firefighters:
Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
General measures:
Dust and fumes from processing; Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.

6.1.1. For non-emergency personnel
No additional information available.

6.1.2. For emergency responders
Protective equipment:
Do not attempt to take action without suitable protective equipment. For further information refer to Section 8: "Exposure controls/personal protection".

For containment:
Contain for re-use.
Methods for cleaning up:
- Recover mechanically the product. No special precautions for large product fragments.
- For dust cleanup use protective equipment. Pick up and transfer to properly labeled containers. Clean contaminated surface thoroughly. Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air). In case of formation of dust during processing, non-sparking tools should be used.

Other information:
- Dispose of materials or solid residues at an authorized site. Clean up spilled material and place in dry containers.

6.4. Reference to other sections
For further information refer to Section 8: Exposure-controls/personal protection.

7.1. Precautions for safe handling
Precautions for safe handling:
- Wear appropriate personal protective equipment. In case of formation of dust during processing, routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixture operations. Provide adequate precautions, such as electrical grounding and bonding or inert atmospheres.

Hygiene measures:
- Do not eat, drink or smoke when using this product. Always wash hands after handling the product.

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions:
- Store in a dry area.

8.2. Exposure controls

Appropriate engineering controls: No special controls required.

In case of formation of dust during processing: It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area. Use only appropriately classified electrical equipment and powered industrial trucks.

Personal protective equipment: Safety glasses, Gloves, Protective clothing.

Hand protection: Protective gloves.

Eye protection: Safety glasses.

Skin and body protection: Wear suitable protective clothing.

Respiratory protection: Dust from processing; if exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.
